```

Workouts

Create Workout

REQUEST BODY SCHEMA: application/json
required

date required	string (Date) YYYY-MM-DD
workout_type required	string (Workout Type)
duration_min required	integer (Duration Min) [1 .. 600]
notes >	Notes (string) or Notes (null) (Notes)

Responses

> **201** Successful Response

> **422** Validation Error

POST /workouts

Request samples

Payload

Content type
application/json

Copy

```
{
    "date": "2026-02-17",
    "workout_type": "Push",
    "duration_min": 1,
    "notes": "string"
}
```

Response samples

201 422

Content type
application/json

Copy

```
{
    "date": "2026-02-17",
    "workout_type": "Push",
    "duration_min": 1,
    "notes": "string",
    "id": 0
}
```

List Workouts

QUERY PARAMETERS

`skip`	integer (Skip) Default: `0`
`limit`	integer (Limit) Default: `50`

Responses

> **200** Successful Response

> **422** Validation Error

GET /workouts

Response samples

200 422

Content type
application/json

Copy Expand all Collapse all

```
