COMP3011 Fitness API (1.0.0)

Download OpenAPI specification: Download

Fitness tracking API with exercise search and workout analytics.

Workouts

Create Workout

Create a new workout record.

REQUEST BODY SCHEMA: application/json

`date` required	string <date> (Date)
`workout_type` required	string (Workout Type) [1 .. 100] characters
`duration_min` required	integer (Duration Min) [1 .. 600]
`notes` >	Notes (string) or Notes (null) (Notes)
`exercises` >	Array of objects (Exercises)

Responses

> **201** Successful Response

> **422** Validation Error

POST /workouts

Request samples

Payload

Content type
application/json

Copy Expand all Collapse all

```
{
    "date": "2026-03-09",
    "duration_min": 60,
  - "exercises": [
      + { … }
    ],
    "notes": "Chest and shoulders session",
    "workout_type": "Push"
}
```

Response samples

201 422

Content type

      + { … }
    ],
    "id": 1,
    "notes": "Chest and shoulders session",
```

```
    "workout_type": "Push"
}
```

List Workouts

Retrieve a list of workout records with optional pagination.

QUERY PARAMETERS

`skip`	integer (Skip) `>= 0` Default: `0` Number of records to skip
`limit`	integer (Limit) `[ 1 .. 200 ]` Default: `50` Maximum number of records to return

Responses

> **200** Successful Response

> **422** Validation Error

GET `/workouts`

Response samples

200 422

Content type
application/json

Copy Expand all Collapse all

```
[
 - {
      "date": "2026-03-09",
      "duration_min": 60,

      "id": 1,
      "notes": "Chest and shoulders session",
      "workout_type": "Push"
   }
]
```

Suggest a workout plan

Returns a simple workout plan using the exercise dataset based on goal, number of training days, equipment, and difficulty.

QUERY PARAMETERS

`goal`	string (Goal) Default: `"strength"` Training goal: strength, hypertrophy, or general_fitness
`days`	integer (Days) `[3 .. 5]` Default: `3` Number of training days per week
`equipment` >	Equipment (string) or Equipment (null) (Equipment) Preferred equipment
`difficulty` >	Difficulty (string) or Difficulty (null) (Difficulty) Preferred difficulty level

Responses

> **200** Successful Response

> **422** Validation Error

GET /workouts/suggest-plan

Response samples

200 422

Content type
application/json

Copy

```
null
```

Get Workout

Retrieve a specific workout using its unique ID.

PATH PARAMETERS

workout_id required	integer (Workout Id)

Responses

> **200** Successful Response

— **404** Workout not found

> **422** Validation Error

GET /workouts/{workout_id}

    ],
    "id": 1,
    "notes": "Chest and shoulders session",
    "workout_type": "Push"
}
```

Update Workout

Update an existing workout entry using its unique ID.

PATH PARAMETERS

workout_id required	integer (Workout Id)

REQUEST BODY SCHEMA: application/json

date >	Date (string) or Date (null) (Date)
workout_type >	Workout Type (string) or Workout Type (null) (Workout Type)
duration_min >	Duration Min (integer) or Duration Min (null) (Duration Min)

notes >	Notes (string) or Notes (null) (Notes)
exercises >	Array of Exercises (objects) or Exercises (null) (Exercises)

Responses

> **200** Successful Response

— **404** Workout not found

> **422** Validation Error

PUT /workouts/{workout_id}

Request samples

Payload

Content type
application/json

    "detail": "Workout not found"
}
```

Analytics

Get workout streak statistics

Returns the current streak, longest streak, and total workout days.

Responses

> **200** Successful Response

GET /analytics/streak

Response samples

200

Content type
application/json

Copy

```
null
```

Get weekly workout summary

Returns workout totals and distribution for a given week.

QUERY PARAMETERS

`week_start` required	string <date> (Week Start) Start date of the week in YYYY-MM-DD format

Responses

> **200** Successful Response

> **422** Validation Error

GET `/analytics/weekly-summary`

Response samples

200 422

Content type
application/json

Copy

```
null
```

Exercise distribution by body part

Returns the number of exercises available for each body part in the exercise dataset.

Responses

> **200** Successful Response

GET /analytics/exercise-distribution/body-part

Response samples

200

Content type
application/json

Copy Expand all Collapse all

Content type
application/json

Copy Expand all Collapse all

```
[
 - {
      "category": "string",
      "count": 0
   }
]
```

Top rated exercises

Returns the highest-rated exercises from the dataset, with optional filtering.

QUERY PARAMETERS

body_part >	Body Part (string) or Body Part (null) (Body Part) Filter by body part
equipment >	Equipment (string) or Equipment (null) (Equipment) Filter by equipment
difficulty >	Difficulty (string) or Difficulty (null) (Difficulty) Filter by difficulty

`exercise_type` ›
Exercise Type (string) or Exercise Type (null) (Exercise Type)
Filter by exercise type

`limit`
integer (Limit) [1 .. 50]
Default: `10`
Maximum number of exercises to return

Responses

› **200** Successful Response

› **422** Validation Error

    "id": 1,
    "name": "Crunch",
    "rating": 8.9,
    "rating_desc": "Highly effective for core activation."
}
```

List exercises

Search and filter exercises from the gym dataset.

QUERY PARAMETERS

`q` >	Q (string) or Q (null) (Q) Search by exercise name or description
`body_part` >	Body Part (string) or Body Part (null) (Body Part) Filter by body part
`equipment` >	Equipment (string) or Equipment (null) (Equipment) Filter by equipment
`difficulty` >	Difficulty (string) or Difficulty (null) (Difficulty) Filter by difficulty level
`exercise_type` >	Exercise Type (string) or Exercise Type (null) (Exercise Type) Filter by exercise type
`sort_by` >	Sort By (string) or Sort By (null) (Sort By) Default: `"recommended"` Sort results: recommended, rating_low_high, rating_high_low
`skip`	integer (Skip) `>= 0` Default: `0` Number of records to skip
`limit`	integer (Limit) `[ 1 .. 200 ]` Default: `50` Maximum number of exercises to return
